

# CORPORATE CAPABILITY STATEMENT

*YOU'RE IN **SAFE HANDS***

### **ATOM Safety Promise:**

If you and your team adopt our recommendations, ATOM Safety guarantees to deliver quantifiable improvements to, and a reduction in the overall cost of, managing your workplace safety.

A black and white photograph of a person wearing a high-visibility safety vest, holding a white hard hat with both hands. The person's face is not visible, and the background is blurred.

## ATOM Safety

We know you take safety seriously – you're responsible for getting employees home safely to their loved ones each day.

Too many Australians are killed on the job, and more than one in a hundred workers suffer a serious workplace injury each year. The majority of these are preventable.

ATOM Safety believes everyone deserves to return home safely from work. Our team is ready to partner with you to mitigate preventable risks from your workplace and help ensure your business is compliant with relevant safety regulations and standards.

As an independent service division of ATOM, Australia's fastest growing industrial and safety supplier, our dedicated team of safety specialists are available to become your trusted partner; someone you can rely on to provide you with credible, intelligent and independent safety product advice and solutions.

The ATOM Safety team are dedicated to staying at the forefront of all safety standards, and all product technologies and innovations available or coming to the market, and passing this knowledge on to you. We will then partner with you to assess your safety compliance and specific safety needs, so that you sleep comfortably each night knowing that you've helped ensure each and every employee returns home safely to their loved ones.

**With ATOM Safety, You're in Safe Hands.**

# ATOM Safety's Program

## Delivering on our promise

ATOM Safety's program has been developed to allow the continual review of health and safety processes, ensuring your safety equipment and procedures are compliant, relevant and effective for the work task.

It all starts with a site safety assessment for your business to identify any risks. This includes reviewing equipment and PPE in use, LTI data and supporting information.

We will present our findings at the end of the site assessment and make suggestions for improvements to business processes or changes to safety products to align with work tasks. We then work with you to determine the best course of action for your safety needs. This may include some or all the following ►

Product Trials

Custom Products

New Product Implementation

Workplace Safety Training

Supporting Documentation

Hearing Fit Testing

Respirator Fit Testing

Uniform Customisation

Uniform Allocation & Management

Control & Compliance Measures

**OUR TEAM OF INDUSTRIAL  
SAFETY SPECIALISTS PARTNER  
WITH YOU **TO MITIGATE**  
**PREVENTABLE RISKS FROM**  
**YOUR WORKPLACE****

# Product Recommendations & Implementation

During your site safety assessment, if any of your PPE or safety products were found not to be suitable for their work task, or we have new product recommendations, ATOM Safety will conduct product trials in conjunction with your HSE advisors to ensure the new products are effective and fit for purpose.

Product trials involve your team utilising the products in their everyday work tasks. We then collect and collate feedback to ensure the product is performing to your expectations. Once you approve the new products, we will work on a change management plan including any training and education required to ensure a smooth transition and successful adoption of the products.

## ATOM Safety also offers advice and assistance with

- ✓ Custom Products
- ✓ Indigenous Sourced Products
- ✓ Sustainable Products

## Our Brand Partnerships

ATOM Safety partners with the worlds leading and most innovative brands to ensure your workplace always has the best PPE available. ►

# Sustainable Products

ATOM Safety work with premium suppliers leading the industry with their sustainability initiatives, allowing you to make sustainably-minded procurement decisions. Through ATOM Safety, you will have access to:

# Workplace Safety Training

Having the correct safety equipment is important but it's equally vital to know how to use it correctly, which is why we encourage regular training. ATOM Safety and our specialist partners provide professional, competency-based workplace safety training and interactive demonstrations to ensure your staff have the knowledge and ability to operate safely at work.

We are available to come to your site to conduct training sessions.

Our program includes, across all safety categories:

- ✓ Understanding glove standards and product selection
- ✓ Care and maintenance of PPE to increase the life of equipment
- ✓ Eye protection impact rating and interpreting markings on lenses
- ✓ Personal Attenuation Rating (PAR) and the importance of hearing conservation programs
- ✓ Effective hydration and heat stress programs
- ✓ ABCs of fall protection and dropped object prevention
- ✓ Confined space entry
- ✓ FR/Arc clothing education

**WE CAN ALSO DEVELOP TAILORED TRAINING OR  
WORKSHOPS FOR YOUR SITE-SPECIFIC NEEDS.**

ATOM Uniforms is a specialist team within ATOM focused solely on making managing your uniforms simple.

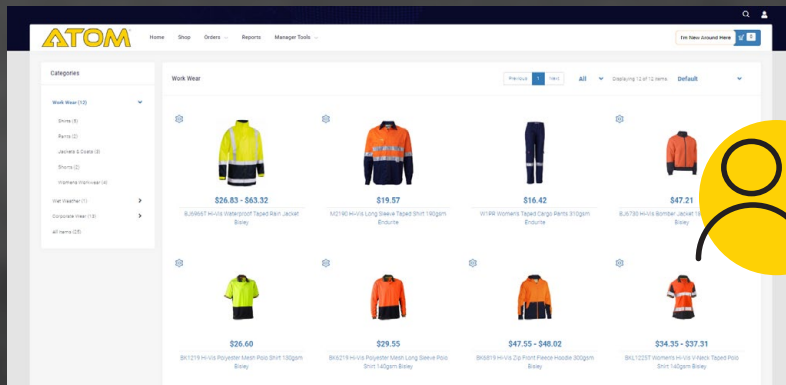

Our game changing Digital Wardrobe solution puts the management of employee uniforms at your fingertips, allowing your team to self-manage their uniform allocations.

Customised to your requirements, our Digital Wardrobe solution lets you dictate allocation rules, initial allocations, frequencies and budget.

We host a portal of your approved company uniform – covering your team from head to toe – according to your corporate branding.

Coupled with ATOM's national supply capabilities and in-house embellishment services, **ATOM Uniforms makes managing uniforms simple.**

## Employee Self-Management

- Your team will login and see a personalised uniform catalogue approved for them
- They can then place an order to flow through your internal approval process, or place an order directly with ATOM subject to limitations you set via Centralised Control
- They can save their preferred name for embellishment and clothing/footwear sizes for easy re-order
- You can give them the option to have their uniforms delivered or collected
- They can see their order history
- They can elect to receive email or SMS notifications updating them on their order

## Centralised Control

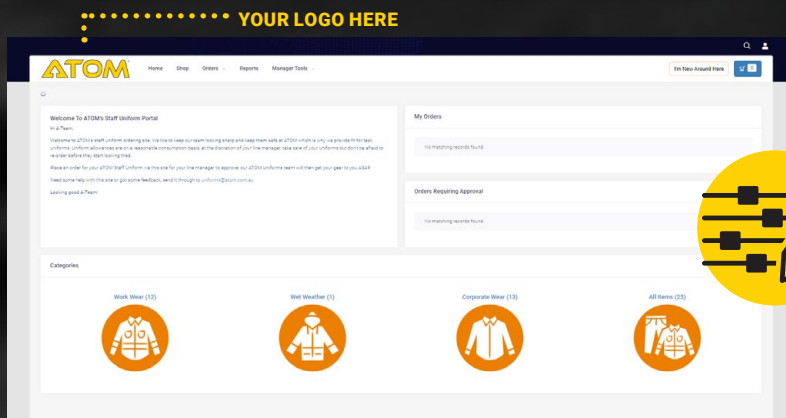

- You can restrict your employee's uniform catalogue based on their job function or any other grouping
- You can set quantity, dollar budget and/or order frequency limits
- You can authorise the roll-over of any unused limits
- You can apply product block-out periods (e.g. not allowing the purchase of jackets during summer)
- You can give access to anyone to order on behalf of multiple employees, and each will receive personalised packages
- You can manage limit rules and approval processes within the platform

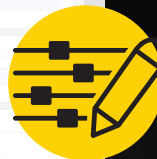

## Smart Reporting

- You can create customised reports to inform you of your employee's purchase history by role, site, cost centre, period, and many more measures
- You can login to see these reports or elect to receive them periodically

## Personalised Experience

- Your company logo will be visible throughout, making it feel like your company's application
- Only your approved uniform catalogue, including approved logos for embellishment, will be visible
- You can use the customisable Message Board to disseminate essential information to all, or any sub-group of employees
- You can tailor the process, from requesting employees fill in a cost centre field to approvals

# Taking Care of Your Uniforms

It starts with their design. ATOM Safety will work with you and our supply partners to design bespoke uniforms, including corporate uniforms, to meet your specific needs.

We then take care of your uniform branding. ATOM Safety will use, or help you develop, your corporate branding guidelines to centrally control the embellishment of your uniforms wherever your employees are in Australia so that it is applied consistently every time. We have a lot of experience managing multi-site, multi-state, multi-logo branding.

ATOM Safety uses ATOM's state of the art in-house embellishment services, with each machine linked to centralised software to guarantee consistency. These embellishment services include embroidery, heat-sealing, 2D and 3D screen-printing, the application of customised taping, and clothing alterations.

Each of ATOM's embellishment service centres is managed by a dedicated Uniforms Coordinator responsible for overseeing your local jobs from start to finish. With experienced in-house and third-party embellishment services coordinated centrally and managed locally, you're guaranteed a consistent, high-quality branding experience with a fast turnaround at all times.

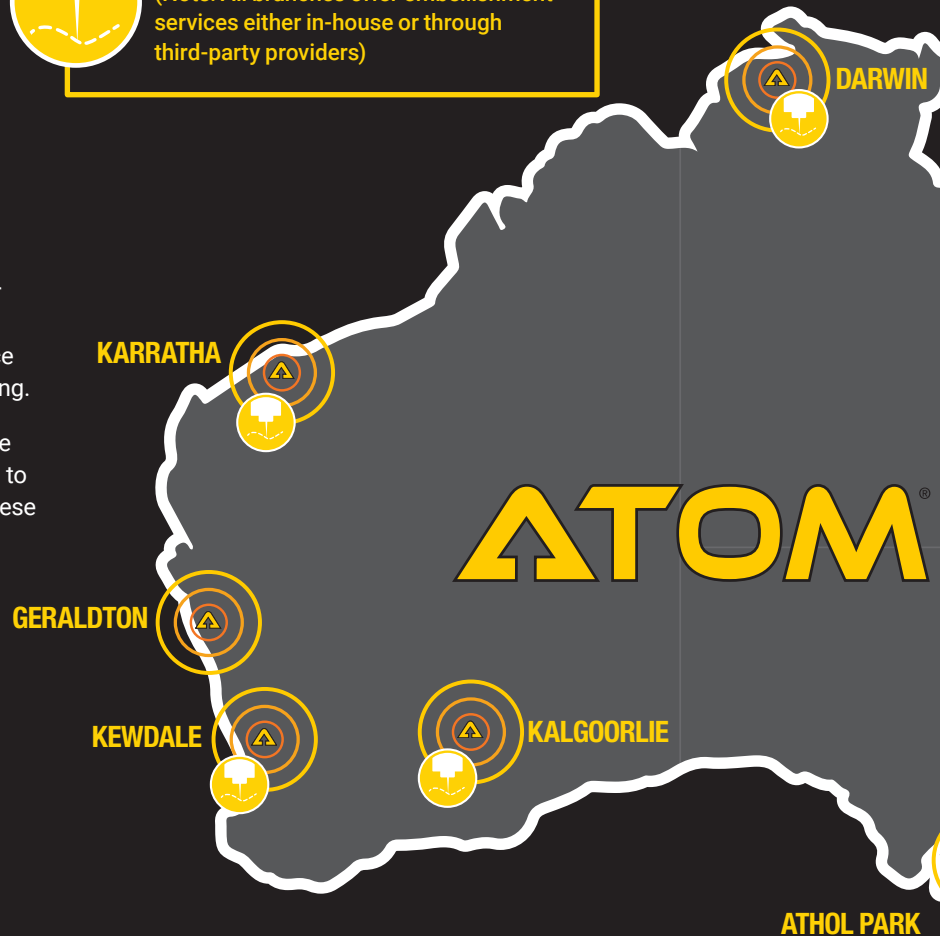

Additionally, with ATOM Safety's proprietary change management and onsite fit out programs, we make large uniform roll outs easy.

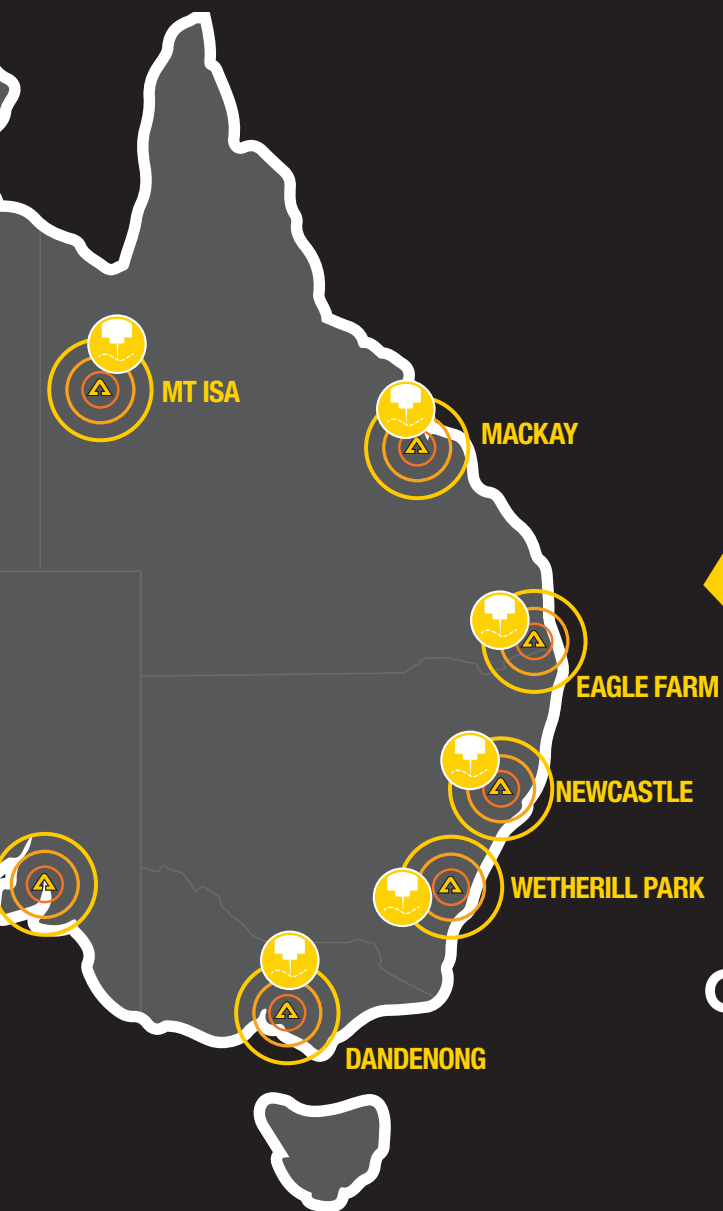

So, invite the ATOM Safety team to your workplace to discuss your needs and they'll ensure your team is dressed suitably from head to toe efficiently and economically.

## In-house Embroidery

(Note: All branches offer embellishment services either in-house or through third-party providers)

## Our Embellishment Services include:

- ✓ In-House Embroidery
- ✓ Heat Sealing
- ✓ Screen Printing
- ✓ Bespoke Uniforms
- ✓ Custom Taping
- ✓ Alterations

**CENTRALLY CONTROLLED,  
LOCALLY DELIVERED**

## Take Control and Guarantee Compliance with ATOMIC Services

After going through the process of assessing, trialling and approving the correct PPE for your employees, your next challenge is ensuring that each of them are complying with your policies by correctly wearing their assigned PPE.

ATOMIC solves this challenge through its proprietary range of customisable inventory control solutions.

Ensure every employee can easily access and is using only their assigned PPE through vending and locker systems that control allocations and monitor consumption. Visualise this in real-time via the ATOMIC Cloud reporting application.

---

### Introducing ATOMIC's "Safety Station"

The ultimate controlled, de-centralised dispensing solution for all your approved safety products, including PPE and uniforms. Through any combination of ATOMIC's customisable vending and locker systems, you can design and implement a Safety Station that will:

- ✓ Give your employees 24/7 access to all their safety product and uniform needs throughout your business or site
- ✓ Control their access to safety products and uniforms by employee, job function, time/consumption limits, and many more variables
- ✓ Track their usage by employee, job function, work order, cost centre, and many more variables
- ✓ Prove their compliance through online reporting
- ✓ Alert you (and ATOMIC) to fast-moving and/or low stock so that either can take responsibility for re-stocking the Stations so your employees will always have access to the safety products and uniforms they need
- ✓ Play safety and other messages customised to your needs on the Station's touch screens
- ✓ Help you keep track of valuable re-usable safety products such as PAPR respirators or SCUBA equipment
